

The PSpice Library List

What is the Library List?

The PSpice Library List is an online listing of all of the parts contained in the libraries that are supplied with PSpice. Every part listed has a corresponding PSpice model. The listings are categorized into the following groups:

<u>Analog</u>	<u>Digital</u>	<u>Mixed Signal</u>
General devices	General devices	General devices
Japanese devices	TTL devices	
European devices		

The listings are divided into columns, like a spreadsheet, and show the following information about each device:

Device Type	Generic Name	Part Name	Part Library	Mfg. Name	Tech Type
The type of device (transistor, diode, etc.).	The generic or standard industry name of the device.	The name of the part in the PSpice library.	The name of the PSpice library the part is stored in.	The name of the manufacturer of the device.	The technology type of the device (TTL, ECL, etc.), where applicable.

Each group is arranged alphabetically by Device Type.

How do I use the Library List?

Accessing a library

To access a particular library list, simply click on the bookmark for the group and device type you are interested in. (Bookmarks are shown in the left-hand column of this Acrobat Reader page. If you do not see the left-hand column for the bookmarks in Acrobat Reader, choose Bookmarks and Page from the View menu.)

Searching for a name

To search for a specific part name, library name, or any other text, use Acrobat Reader's built-in Find function. (From the Tools menu, choose Find and then enter the text you want to search for.)

What is the Library List Index?

The Index lists all of the PSpice libraries in alphabetical order, with their respective parts also sorted alphabetically within each library. You can use the Index to see a complete list of all the parts in a particular library file.

Analog Library - General Devices

Device Type	Generic Name	Part Name	Part Library	Mfg. Name	Tech Type
AF Transistor	BC327	BC327/SIE	SIEMENS.OLB	Infineon	
AF Transistor	BC328	BC328/SIE	SIEMENS.OLB	Infineon
